CONTENTS

VOLUME 96 · NUMBER 1 · JULY 1990

1 PAMELA A. PAPPONE and GAIL L. BARCHFELD. Modifications of single acetylcholine-activated channels in BC3H-1 cells. Effects of trimethyloxonium and pH

23 LAWRENCE G. PALMER, IRENE CORTHESY-THEULAZ, HANS-PETER GAEGGELER, JEAN-PIERRE KRAEHENBUHL, and BERNARD ROSSIER. Expression of epithelial Na channels in *Xenopus* oocytes

47 CARLO CAPUTO and PURA BOLAÑOS. Ultraslow contractile inactivation in frog skeletal muscle fibers

57 ROY E. FURMAN and JACQUELINE C. TANAKA. Monovalent selectivity of the cyclic guanosine monophosphate–activated ion channel

83 HÉLÈNE WIDMER, SERGE POITRY, and MARCOS TSACOPOULOS. The increase of oxygen consumption after a flash of light is tightly coupled to sodium pumping in the lateral ocellus of barnacle

109 MICHAEL R. SILVER and THOMAS E. DECOURSEY. Intrinsic gating of inward rectifier in bovine pulmonary artery endothelial cells in the presence or absence of internal Mg^{2+}

135 CHARLES K. SOLC and RICHARD W. ALDRICH. Gating of single non-*Shaker* A-type potassium channels in larval *Drosophila* neurons

167 STEEN DISSING and JOSEPH F. HOFFMAN. Anion-coupled Na efflux mediated by the human red blood cell Na/K pump

195 MICHAEL C. SANGUINETTI and NANCY K. JURKIEWICZ. Two components of cardiac delayed rectifier K^+ current. Differential sensitivity to block by class III antiarrhythmic agents

217 INFORMATION FOR AUTHORS

VOLUME 96 · NUMBER 2 · AUGUST 1990

225 W. KNOX CHANDLER and CHIU SHUEN HUI. Membrane capacitance in frog cut twitch fibers mounted in a double Vaseline-gap chamber

257 CHIU SHUEN HUI and W. KNOX CHANDLER. Intramembranous charge movement in frog cut twitch fibers mounted in a double Vaseline-gap chamber

299 CARLOS OLIVA, IRA S. COHEN, and PETER PENNEFATHER. The mechanism of rectification of i_{K1} in canine Purkinje myocytes

319 JON STRIETER, JOHN L. STEPHENSON, LAWRENCE G. PALMER, and ALAN M. WEINSTEIN. Volume-activated chloride permeability can mediate cell volume regulation in a mathematical model of a tight epithelium

345 M. Carter Cornwall, Alan Fein, and Edward F. MacNichol, Jr. Cellular mechanisms that underlie bleaching and background adaptation

373 L. Toro, J. Ramos-Franco, and E. Stefani. GTP-dependent regulation of myometrial K_{Ca} channels incorporated into lipid bilayers

395 Steven M. Sine, Toni Claudio, and Fred J. Sigworth. Activation of *Torpedo* acetylcholine receptors expressed in mouse fibroblasts. Single channel current kinetics reveal distinct agonist binding affinities

Letters to the Editor

439 John L. Sutko and James L. Kenyon. Actions of ryanodine

443 Roberto Coronado. Reply to J. L. Sutko and J. L. Kenyon

VOLUME 96 · NUMBER 3 · SEPTEMBER 1990

449 S. M. Baylor and S. Hollingworth. Absorbance signals from resting frog skeletal muscle fibers injected with the pH indicator dye, phenol red

473 S. Hollingworth and S. M. Baylor. Changes in phenol red absorbance in response to electrical stimulation of frog skeletal muscle fibers

493 P. C. Pape, M. Konishi, S. Hollingworth, and S. M. Baylor. Perturbation of sarcoplasmic reticulum calcium release and phenol red absorbance transients by large concentrations of fura-2 injected into frog skeletal muscle fibers

517 Paul P. M. Schnetkamp. Cation selectivity of and cation binding to the cGMP-dependent channel in bovine rod outer segment membranes

535 Christopher L.-H. Huang. Voltage-dependent block of charge movement components by nifedipine in frog skeletal muscle

559 Naohide Yamashita, Sergio Ciani, and Susumu Hagiwara. Effects of internal Na^+ on the Ca channel outward current in mouse neoplastic B lymphocytes

581 David E. Harris and David M. Warshaw. Slowing of velocity during isotonic shortening in single isolated smooth muscle cells. Evidence for an internal load

603 Chinfei Chen and Peter Hess. Mechanism of gating of T-type calcium channels

631 George R. Ehring, Guido Zampighi, Joseph Horwitz, Dean Bok, and James E. Hall. Properties of channels reconstituted from the major intrinsic protein of lens fiber membranes

665 E. KAPLAN, R. B. BARLOW, G. RENNINGER, and K. PURPURA. Circadian rhythms in *Limulus* photoreceptors. II. Quantum bumps

VOLUME 96 · NUMBER 4 · OCTOBER 1990

689 DOUGLAS S. KRAFTE, ALAN L. GOLDIN, VANESSA J. AULD, ROBERT J. DUNN, NORMAN DAVIDSON, and HENRY A. LESTER. Inactivation of cloned Na channels expressed in *Xenopus* oocytes

707 GERGELY L. LUKÁCS and EDWARD MOCZYDLOWSKI. A chloride channel from lobster walking leg nerves. Characterization of single-channel properties in planar bilayers

735 ROBERTA W. SCHERER and GERDA E. BREITWIESER. Arachidonic acid metabolites alter G protein–mediated signal transduction in heart. Effects on muscarinic K^+ channels

757 SHERRILL SPIRES and TED BEGENISICH. Modification of potassium channel kinetics by histidine-specific reagents

777 JINMING LI and JUNKO KIMURA. Translocation mechanism of Na-Ca exchange in single cardiac cells of guinea pig

789 LAN-BO SHI, YONG-XIONG WANG, and A. S. VERKMAN. Regulation of the formation and water permeability of endosomes from toad bladder granular cells

809 KUMIKO SUGIMOTO and JOHN H. TEETER. Voltage-dependent ionic currents in taste receptor cells of the larval tiger salamander

835 JEFFREY R. BALSER, PAUL B. BENNETT, and DAN M. RODEN. Time-dependent outward current in guinea pig ventricular myocytes. Gating kinetics of the delayed rectifier

865 T. NAKAJIMA, S. WU, H. IRISAWA, and W. GILES. Mechanism of acetylcholine-induced inhibition of Ca current in bullfrog atrial myocytes

887 T. NAKAJIMA, H. IRISAWA, and W. GILES. *N*-Ethylmaleimide uncouples muscarinic receptors from acetylchyoline-sensitive potassium channels in bullfrog atrium

VOLUME 96 · NUMBER 5 · NOVEMBER 1990

905 ROBERT O. BLAUSTEIN and ALAN FINKELSTEIN. Voltage-dependent block of anthrax toxin channels in planar phospholipid bilayer membranes by symmetric tetraalkylammonium ions. Effects on macroscopic conductance

921 ROBERT O. BLAUSTEIN, E. J. A. LEA, and ALAN FINKELSTEIN. Voltage-dependent block of anthrax toxin channels in planar phospholipid bilayer membranes by symmetric tetraalkylammonium ions. Single-channel analysis

943 ROBERT O. BLAUSTEIN and ALAN FINKELSTEIN. Diffusion limitation in the block by symmetric tetraalkylammonium ions of anthrax toxin channels in planar phospholipid bilayer membranes

959 C. E. AMORENA, T. J. WILDING, J. K. MANCHESTER, and A. ROOS. Changes in intracellular pH caused by high K in normal and acidified frog muscle. Relation to metabolic changes

973 J. TYTGAT, B. NILIUS, and E. CARMELIET. Modulation of the T-type cardiac Ca channel by changes in proton concentration

991 MICHAEL L. JENNINGS, RICHARD K. SCHULZ, and MARK ALLEN. Effects of membrane potential on electrically silent transport. Potential-independent translocation and asymmetric potential-dependent substrate binding to the red blood cell anion exchange protein
